From its strong roots in Intel® vPro™ technology, the Intel® Desktop Board DQ77KB marks another pinnacle for boards in the business segment with its thin mini-ITX solution.

The Intel® Desktop Board DQ77KB is designed and engineered to support business environments where operational efficiency and effectiveness counts. The board supports the latest AMT 8.0 and is equipped with Intel® Identity Protection Technology (Intel® IPT) as well as Intel® Anti-Theft Technology (Intel® AT). It is also one of the only business boards that comes with dual-LAN to enable link aggregation and improves Ethernet throughput. On top of essential features, Intel® Desktop Board DQ77KB houses great expandability options from USB3.0 to PCIe* mini with the ability to support triple-display. With its z-height profile at just 20mm, Intel® Desktop Board DQ77KB is the absolute choice for small form factor applications, especially in All-In-One (AIO) systems. Understanding the importance for businesses to maintain a stable operating platform, Intel® Desktop Board DQ77KB is secured with Stable Image Platform Program (SIPP) and Extended Life Program (XLP). Make your business investments worthwhile.
